NOTE: This update must be performed on a MAC OS X 10.7 or later

1) Download the SpinFX Firmware Update program from the following URL:

http://www.spin-fx.com/fw-updates/spinfx-phoenix-updater-mac-1.0.dmg

Save the .dmg file to a folder on your computer (perhaps called "SpinFX")

2) Open the .dmg file. A diaglog box may open like seen below, select "open."

3) Double click the Phoenix Updater program to open.

- 4) Plug your hoop into the computer with the provided USB cable and turn your hoop on. The hoop will cycle through red, green, blue.
- 5) In the updater program find the latest version of firmware by recognizing the date. (yyy-mm-dd) **Select the most recent date** and click "update firmware." The update will begin with the latest version of firmware.
- 6) A dialog box may appear indicating an error ejecting/unmounting the disk... Ignore this and select OK.

- 7) The hoop will shut off while the firmware is being updated. This is normal do not attempt to remove or restart the hoop while it is in this mode.
- 8) Once the update is complete you will see the updater say "Phoenix Hoop successfully updated...disconnect hoop and quit."
